How do the project's objectives fit in with the modernisation and internationalisation agenda of the targeted higher education institutions in the Partner Countries and with the development strategy for higher education in each Partner Country involved in the project? (limit 6.000 characters)

The modernisation and internationalization agenda of the involved higher education institutions are aligned with the strategy for higher education in Uzbekistan (there is full integration). MechaUz builds on this by:

- a) introducing a unique/new course (Bachelors) in Mechatronics
- b) Mainstreaming international collaboration (EU) in higher education curriculum development
- c) Ensuring higher education staff internationalization (through international trainings)
- d) Ensuring degree internationalization & standardization through ECTS (fostering student mobility)
- e) Improving the infrastructure & operational capacity of universities through the Industry 4.0 Labs (iLABS)
- f) Fostering the third mission of universities by enabling university-industry & triple helix collaboration (through the developed methodology/guide)
- g) Attracting more students & improvement of capacity of universities in the field of Mechatronics

(Please add Partner Countries/partners as appropriate)
