

# HISTORY

**For over the years of independence the Republic of Uzbekistan has carried out fundamental, structural and substantive reforms that have encompassed all levels of education system and its components, which were aimed at ensuring its compliance with the long-term objectives and interests of the country, modern requirements, as well as international standards. The appropriate legal framework reforming this sector was created, which defined as a priority the growth of investment, as well as the investments in human capital, training of educated and intellectually developed generation**

# The Model of educational system

# PARTNERSHIP

A series of agreements of the governmental and interdepartmental nature, which are the basis of direct inter-university cooperation with foreign partners have been signed. Universities of Uzbekistan take active part in educational, scientific and technological projects of the European Union's Erasmus+ and Erasmus Mundus, the British Council, the German Academic Exchange Service, the Goethe Institute, the German Technical Center, the Korean and the Japanese International Cooperation Agency, the French and the Egyptian Cultural Centre, Malaysian and India's technical cooperation programs, the UNDP, UNESCO, ETF, ADB and others. All of these projects and programs aim the improvement of the educational and methodical process training of teaching staff, innovation and technological development, student exchange.
